THIRTY-SEVENTH

ANNUAL CATALOGUE

OF THE OFFICERS AND STUDENTS OF

MONMOUTH COLLEGE

FOR THE

ACADEMICAL YEAR ENDING JUNE 8th, 1893.

Monmouth, Illinois: McMilian-McDonald Co. 1893. Opened September 3, 1856. Incorporated February 7, 1857.

Calendar for 1893-1894.

Examination of Candidates for Admission, Begins 9 a. m. S	eptember 6–7
Fall Term Begins at 2 p. m	.September 6
Fall Term Ends	.December 21
Winter Term Begins at 2 p. m	January 9
Day of Prayer for Colleges	January 24
Winter Term Ends	March 29
Spring Term Begins at 2 p. m	April 10
Senior Examinations	May 21–25
Final Examinations	June 5–8
Baccalaureate Sermon by the President at 3 p. m	June 10
Sermon Before the Christian Union at 8 p. m	June 10
Annual Prayermeeting in College Chapel at 8 p. m	June 11
Annual Meeting of the Senate at 10:30 a. m	June 12
Class Night at 8 p. m	June 12
Annual Meeting of the Alumni Association at 9 a. m	June 13
Public Exercises of Alumni Association at 8 p. m	June 13
Commencement Day	June 14
Annual Concert at 8 p. m	June 14
June Examinations for Admission	5-8

The Senate.

The corporate powers of the Monmouth College are vested in the Senate, which consists of the following Trustees and Directors convened in joint session; and for certain purposes, in the Trustees convened separately.

The next annual meeting of the Senate will be held in the College, in room No. 2, on Tuesday, June 6, A. D. 1893, at 10:30 o'clock A. M. The presence of FIVE Trustees and NINE Directors is necessary to constitute a quorum.

TRUSTEES.

A. H. DEAN, J. R. HANNA, R. A. WILSON, W. T. CAMPBELL, E. BLACK, W. S. WEIR, DAVID GRAHAM, JOSEPH STEVENSON.

DIRECTORS.

The term of office of the following expires Jan	uary 1, 1896:
Rev. D. C. Stewart	St. Louis, Mo.
Rev. J. W. Cleland	Peotone.
Draper Babcock, Esq	Monmouth.
Rev. C. S. Cleland	Le Claire, Iowa.
Rev. J. S. Colvin	.Mission Creek, Neb.
Col. J. D. Palmer	Washington, Iowa.
G. I. Gordon	Dunreith, Ind.
A. W. Brandt, Esq	Des Moines, lowa.
Rev. S. R. Lyons	Bloomington, Ind.
Rev. G. W. Hamilton	Bellfontaine, Ohio.

The term of office of the following expires Januar	у 1, 1895:
Rev. D. S. Kennedy, D. D	Somonauk.
Weaver White	Paxton.
Rev. J. M. Hamilton	Reinback, Iowa.
Rev. J. A. Ferguson	Loveland, Col.

Rev. Andrew Renwick	Alexis.
Rev. J. D. Lytle	
Rev. W. S. McClure	
Rev. W. S. Lorimer	
Rev. W. H. French	Rushville, Ind.

The term of office of the following expires	January 1, 1894:
Rev. C. H. Mitchell	Keota, Iowa.
Rev. J. K. Montgomery	Sparta.
Rev. James Sawhill	
Smith Hamill, Esq	Keokuk, Iowa.
Rev. J. M. French	Omaha, Neb.
W. P. Pressly, Esq	
Rev. J. W. Kerr	Piqua, Ohio.
Rev. R. B. Patton	Columbus, Ohio.
E. E. Elliott. Esq	Morning Sun, Ohio.
Rev. W. E. Shaw	Davenport, Iowa.

The following were elected Directors by the Alumni to represent them in the Senate:

William Yost, Esq., Pittsburg, Pa., for 3 years from January 1, 1891. Hon. W. C. Norcross, Monmouth, Ill., for 3 years from January 1, 1892. Hon. J. H. McCulloch, Omaha, Neb., for 3 years from January 1, 1893.

OFFICERS OF THE SENATE AND TRUSTEES.

J. B. McMichael, D. D	President.
J. E. Alexander, A. M	SECRETARY.
R. A. Wilson, A. M	Treasurer.

LADIES' ADVISORY BOARD.

MARTHA A. COOKE, PRESIDENT.

MRS. A. C. HARDING, MRS. J. J. GLENN, MRS. C. HARDIN, MRS. M. D. STERRET, MRS. J. B. McMichael, MRS. J. H. Reid, MRS. JOSEPH STEVENSON.

Faculty and Instructors.

J. B. McMICHAEL, PRESIDENT And Alumni Professor of Logic, Philosophy and Biblical Instruction.

> JOHN H. McMILLAN, VICE PRESIDENT And Professor of Latin and Hebrew.

MARTHA A. COOKE, LADY PRINCIPAL And Harding Professor of English Literature.

J. H. WILSON, Professor of Greek.

THOS. H. ROGERS, Professor of Mathematics.

RUSSELL GRAHAM, Professor of Social Science.

CLEMENTINE CALVIN, Professor of German and Elocution.

SAMUEL S. MAXWELL, Professor of Biology.

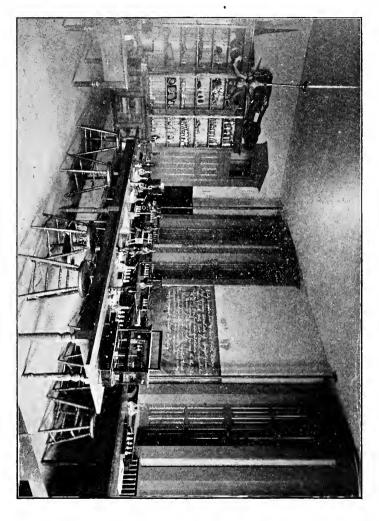

H. C. BIDDLE, Pressley Professor of Physical Science.

E. C. ZARTMAN, Professor of Vocal and Instrumental Music.

THOS. S. McCLANAHAN, Instructor in Practical Surveying and Engineering.

ALICE WINBIGLER.
Instructor in Mathematics.

T. B. GLASS. Instructor in Latin.

Officers of the Faculty.

J. B. McMICHAEL, President.

JOHN H. McMILLAN, Vice President.

> H. C. BIDDLE, Secretary.

J. H. WILSON, Treasurer.

JOHN H. McMILLAN, Registrar.

RUSSELL GRAHAM, Librarian.

Material Advantages.

The city of Monmouth, in which the College is located, contains about seven thousand inhabitants, and is situated at the junction of the Main Line and the St. Louis Division of the Chicago, Burlington & Quincy Railroad, and also of the Central Iowa and Santa Fe. It has all the modern improvements and conveniences of cities of much larger population. A fine system of waterworks which supplies the city with pure artesian water; the principal streets paved with brick and lighted with electricity; and free postal delivery made to all parts of the city are some of the material advantages. The city is noted for its fine churches and for the intellectual and moral character of its people. The College building is situated in a beautiful campus of ten acres covered with various kinds of forest trees. The entire building is heated with steam and lighted with gas.

LIBRARY.

It is impossible to over-estimate the benefit to those pursuing a college course of free access to well selected books. Few institutions afford library advantages superior to those of Monmouth College. Through the liberality of W. P. Pressly, Esq., the Warren County Library was established in 1870; and by an arrangement made by the College, this library is open to all the students, free of charge in the room. one of the best established, conducted and selected libraries in the West. Its endowment is about \$20,000. It contains at present about fifteen thousand volumes, and some six hundred books of the best current literature are added yearly. Prof. Rogers, who has been the Secretary of the Library Association since its foundation, devotes much time to the careful selection of books to be purchased, and renders invaluable assistance to the students in finding works helpful in any investigation they may be pursuing. Connected with the Library is a large and pleasant Reading Room, supplied with all the leading papers, magazines and reviews, both English and American. In the number and expense of periodicals furnished, it is the first in the state outside of Chicago.

GYMNASIUM.

There is no Gymnasium under direction of the College, but the one in connection with the Y. M. C. A. is fitted up in the most modern style, and is well furnished with all the appliances of a first-class institution of the kind. A competent instructor in physical culture is one of the chief attractions. For five dollars a year students will be entitled, not only to all the privileges of the Gymnasium, but to the bath rooms, etc., of the Y. M. C. A. This is much cheaper and better than could be afforded under direction of the College.

Requisites for Admission.

- I. The classification of all students applying for admission to Monmouth College will be by examination, not by certificate, except as provided for in the following:
- (1.) Students may be admitted to classes above Freshman on the certificate of honorable dismissal from colleges of like standing with this. Candidates on furnishing proper certificates of their standing (blanks for said certificates being supplied by the College) shall be admitted from any one of the following schools to the Freshman class without examination, in so far as these completed studies correspond with the studies below the Freshman class:

The Albany Collegiate Institute, Albany, Oregon.

Monmouth High School, Monmouth, Illinois.

Xenia High School, Xenia, Ohio.

Marissa Academy, Marissa, Illinois.

Burlington High School, Burlington, Iowa.

Kewanee High School, Kewanee, Illinois.

Collegiate Institute, Geneseo, Illinois.

Davenport High School, Davenport, Iowa.

Rock Island High School, Rock Island, Illinois.

Also on Regents' Pass Cards, N. Y.

- (2.) Students coming from well established Academies and High Schools, whose course corresponds with that of this school, are requested to bring official certificates, not Diplomas, from such schools. These certificates shall state what subjects have been studied, with the time devoted to each and the author of the text book used, and the standing in recitation and examination. Blank forms of such certificates will be furnished on application to the President of this College. These certificates will be used by each Professor holding entrance examinations, in determining the extent of examinations needful in his department. Applicants desiring to avail themselves of the benefit of these certificates must have them with them when they present themselves for admission.
- (3.) Candidates for admission to the Junior Preparatory must be prepared for examination on Orthography, English Grammer, Arithmetic; and to any higher class, on the work or its equivalent, required in the lower class or classes.
- (4.) The rank of each new student applying for admission is determined by balancing his credits and deficits.

(5.) Pupils admitted to any class must take all subjects in the course with that class, unless excused by examination conducted by the Professor to whose department the subjects belong.

(6.) No student of known immoral character, and none whose influence is likely to be injurious to good order, will be admitted. Applicants for admission, unknown to any member of the Faculty, should bring certificates of good moral character.

Courses of Instruction.

CLASSICAL COURSE.

FRESHMAN CLASS.—FIRST TERM.

LATIN.—Cicero's Orations and Letters; Latin Prose Composition.

GREEK.—Xenophon's Anabasis.

MATHEMATICS.—Geometry completed.

 ${\tt English.--Composition}$ and Rhetoric; Selections from English Literature.

BIBLE.—One hour a week throughout the year.

SECOND TERM.

LATIN.—Cicero; Roman History.

GREEK.-Xenophon's Anabasis.

MATHEMATICS.—Plane Trigonometry.

English.—Trench's Study of Words.

BIOLOGICAL SCIENCE.—Botany begun.

THIRD TERM.

LATIN.—Cicero; Sight Reading.

Greek.—Lysias.

MATHEMATICS.—Mensuration, and Spherical Trigonometry.

BIOLOGICAL SCIENCE.—Botany.

SOPHOMORE CLASS.—FIRST TERM.

LATIN.—Horace's Odes.

GREEK.—Xenophon's Memorabilia; Grecian History.

MATHEMATICS.—Mathematical Review; Practical Surveying, optional.

HISTORY.—History of England.

BIBLE.—One hour a week throughout the year.

ELOCUTION.—Rhetorical Exercises one hour a week throughout the year.

SECOND TERM.

LATIN.—Horace, Satires and Epistles.

GREEK.-Memorabilia completed; Grecian History.

MATHEMATICS.—Analytical Geometry.

HISTORY.—History of England finished.

English.—Milton's Paradise Lost begun.

THIRD TERM.

LATIN.—Tacitus' Germania and Agricola; Latin Literature.

GREEK.—Demosthenes De Corona.

MATHEMATICS.—Calculus.

English.—Macaulay's Essays.

JUNIOR CLASS.—FIRST TERM.

 G_{REEK} .—Demosthenes De Corona completed.

RHETORIC.—Whately's Rhetoric with Lectures.

Physical Science.—Mechanics and Physics begun.

English.—English Literature, with Selections.

BIBLE.—One lesson a week throughout the year.

ELOCUTION.—One hour a week throughout the year.

SECOND TERM.

GREEK.—Plato's Apology.

SOCIAL SCIENCE.—Political Economy.

Physical Science.—Physics.

English.—English Literature, with Selections.

THIRD TERM.

GREEK.-Prometheus Bound.

CIVIL GOVERNMENT.—The Constitution of the United States.

PHYSICAL SCIENCE.—Physics.

English.—English Literature, with Selections.

SENIOR CLASS.—FIRST TERM.

HEBREW. - Harper's Hebrew Grammar and Manual.

Physical Science.—Chemistry.

Philosophy.—Psychology and Metaphysics.

MORAL PHILOSOPHY.—Ethics and Evidences of Christianity.

ELOCUTION.—One hour per week throughout the year.

SECOND TERM.

Hebrew.—Hebrew.

Рицоворну.—History of Philosophy.

Logic.—Logic begun, last part of term.

Physical Science.—Geology.

English.—Shakespeare.

THIRD TERM.

HEBREW.—Hebrew.
Physical Science.—Geology.
Logic.—Logic.
English.—Shakespeare.

SCIENTIFIC COURSE.

FRESHMAN CLASS.—FIRST TERM.

LATIN.—Cicero's Orations and Letters: Latin Prose Composition. BIOLOGICAL SCIENCE.—General Biology.

MATHEMATICS.—Geometry completed.

ENGLISH.—Composition and Rhetoric: Selections from English Literature.

BIBLE.—One hour a week throughout the year.

SECOND TERM.

LATIN.—Cicero's Orations.
BIOLOGICAL SCIENCE.—General Biology.
HISTORY.—Roman History.
MATHEMATICS.—Plane Trigonometry.
ENGLISH.—Trench's Study of Words.

THIRD TERM.

LATIN.—Cicero's Orations; Sight Reading.
BIOLOGICAL SCIENCE.—Botany.
MATHEMATICS.—Mensuration, and Spherical Trigonometry.

SOPHOMORE CLASS.—FIRST TERM.

MATHEMATICS.—Review of Mathematics; Practical Surveying, optional.

Physical Science.—Chemistry.

HISTORY.—General History.

ELOCUTION.—One lesson a week throughout the year.

BIBLE.—One lesson a week throughout the year.

SECOND TERM.

MATHEMATICS.—Analytical Geometry.
BIOLOGICAL SCIENCE.—Zoology.
PHYSICAL SCIENCE.—Chemistry.
HISTORY.—General History.

THIRD TERM.

MATHEMATICS.—Calculus.
BIOLOGICAL SCIENCE.—Zoology; Embryology of the Chick.
Physical Science.—Chemistry.
History.—General History.

JUNIOR CLASS.—FIRST TERM.

RHETORIC.—Whately's Advanced Rhetoric.
GERMAN.—German Lessons.
PHYSICAL SCIENCE.—Mechanics and Physics begun.
ENGLISH.—English Literature with Selections.
ELOCUTION.—One hour a week throughout the year.
BIBLE.—One hour a week throughout the year.

SECOND TERM.

GERMAN.—Joynes-Meissner's Grammar and Reader. Social Science.—Political Economy. Physical Science.—Physics.
English.—English Literature with selections.

THIRD TERM.

GERMAN.—Joynes-Meissner's Grammar and Reader. CIVIL GOVERNMENT.—Constitution of the United States. Physical Science.—Physics. English.—English Literature with selections.

SENIOR CLASS.—FIRST TERM.

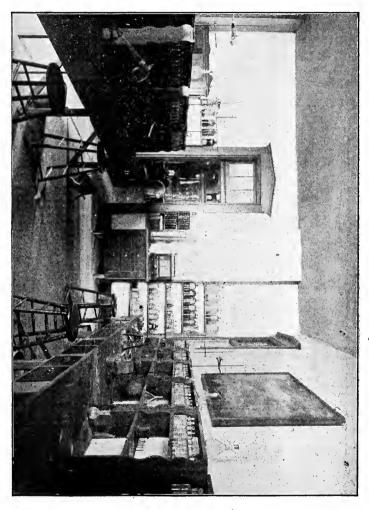

Philosophy.—Psychology and Metaphysics.
Moral Philosophy.—Ethics and Evidences of Christianity.
German.—Selections from Various Authors.
Mathematics.—Astronomy.
Elocution.—One hour a week throughout the year.

SECOND TERM.

Philosophy.—History of Philosophy; Logic begun. English.—Shakespeare. German.—Classical Selections. Physical Science.—Geology.

THIRD TERM.

Logic.—Deductive and Inductive Reasoning. English.—Shakespeare. German.—Classical Selections. Physical Science.—Geology.

CHEMICAL LABORATORY.

LITERARY COURSE.

FRESHMAN CLASS.—FIRST TERM.

LATIN.—Cicero's Orations and Letters; Latin Prose Composition.

BIOLOGICAL SCIENCE.—General Biology.

MATHEMATICS.—Geometry, completed.

English.—Composition and Rhetoric; Selections from English Literature.

BIBLE.—One hour a week throughout the year.

SECOND TERM.

LATIN.—Cicero.

HISTORY.—Roman History.

BIOLOGICAL SCIENCE.—General Biology.

MATHEMATICS.—Plane Trigonometry.

English.—Trench's Study of Words.

THIRD TERM.

LATIN.—Cicero's Orations; Sight Reading.

Mathematics.—Mensuration, and Spherical Trigonometry.

BIOLOGICAL SCIENCE.—Botany.

JUNIOR CLASS.—FIRST TERM.

HISTORY.—English History.

RHETORIC.—Advanced Rhetoric.

GERMAN.-German Lessons.

Physical Science.—Physics.

MATHEMATICS.—Review of Mathematics.

English.—English Literature with Selections.

BIBLE.—One hour a week throughout the year.

ELOCUTION.—One lesson a week throughout the year.

SECOND TERM.

ENGLISH.—History of England finished; Milton begun; English Literature with selections.

GERMAN.—Joynes-Meissner's Grammar.

Physical Science.—Physics.

BIOLOGICAL SCIENCE.—Zoology.

Social Science.—Political Economy.

THIRD TERM.

English.—Macaulay's Essays; English Literature with Selections.

GERMAN.—Joynes-Meissner's Grammar and Reader.

PHYSICAL SCIENCE.—Physics.

Biological Science.—Zoology.

CIVIL GOVERNMENT.—Constitution of the United States.

SENIOR CLASS.—FIRST TERM.

Philosophy.—Psychology and Metaphysics.

MORAL PHILOSOPHY.—Ethics and Evidences of Christianity.

German.—Selections from Various Authors.

MATHEMATICS.—Astronomy.

ELOCUTION.—One hour a week throughout the year.

SECOND TERM.

Philosophy.—History of Philosophy; Logic begun.

English.—Shakespeare.

German.—Classical Selections.

Physical Science.—Geology.

THIRD TERM.

Logic.—Deductive and Inductive Reasoning.

English.—Shakespeare.

German.—Classical Selections.

PHYSICAL SCIENCE.—Geology.

ELECTIVES.

CLASSICAL COURSE.—SOPHOMORE YEAR.

SECOND TERM.—Chemistry instead of Analytical Geometry.
THIRD TERM.—Chemistry instead of Calculus.

SENIOR YEAR,

THROUGHOUT THE YEAR.—General Biology instead of Hebrew.

LITERARY COURSE.—JUNIOR YEAR.

FIRST TERM.—General History or Horace instead of German; Music instead of Physics.

SECOND TERM.—General History or Horace instead of German; Music or Physics instead of Zoology.

THIRD TERM.—General History or Tacitus instead of German; Music or Physics instead of Zoology.

SENIOR YEAR.

FIRST TERM.—Chemistry instead of Astronomy.

Second Term.—Chemistry instead of Geology.

THIRD TERM.—Chemistry instead of Geology.

In addition to the above there are the following courses:

LITERARY-MUSIC COURSE.

This course is the same as the Literary Course, with one full year of music extra, and leads to Degree of B. L., with certificate of Music.

MUSIC COURSE.

This is a course of four years, leading to Degree of B. M. (See pages 31-34 Catalogue.

OUTLINES OF THE WORK OF DEPARTMENTS.

PHILOSOPHY AND REVELATION.

Psychology.—Empirical and rational, is given the Senior class five hours in the week for five months. Bowen's Hamilton is the text book in use, with constant reference to consciousness as the book of final appeal. The intellectual faculties, sensibilities and the will, including the desires, are recognized as the three-fold phenomena of the indivisible thinking subject, though attention is specially given the first, both in perception and apperception.

The History of Philosophy and Logic occupy the remaining months of the Senior year. Lectures are given on the origin and progress of the philosophical METHOD in searching for the beginning of things. Though many theories and systems have been exploded, it is insisted upon that the METHOD of reasoning has preserved its dignity through all the history of ancient and modern philosophy.

Logic.—Jevon's Elements is the text book. After familiarizing the class with the definitions of terms, propositions and the syllogism exercises are given in deduction and induction, reasoning and special attention to the detection of fallacies.

THE BIBLE is the unchangeable text book of the College. All the classes are required to recite in it one hour each week. The Freshman and Preparatory Classes receive instruction in the life of Christ, both in its historical and spiritual aspects, and always with the end in view of leading the student to "see the place where the Lord lay." The other classes, with the same end in view, are given instruction in the Bible with the help of Smith's Old and New Testament History, constant reference and appeal being made to the infallible record itself.

DEPARTMENT OF LATIN AND HEBREW.

LATIN.—FRESHMAN YEAR.

In this year the literary part of the work is begun which from this point grows in prominence. Work in Syntax, however, is not neglected. Constant review and an inductive Syntax study is made of the First and Second Orations against Cataline.

Word formation, enlarged vocabulary, clause relations, sentence building, etymological and rhetorical figures, structure of the paragraph, analysis of orations are topics which suggest the work of the year.

Sight reading and Latin Prose Composition are continued. An outline study of Roman History is pursued. Roman private life, embrac-

ing customs, habits, governments, etc., is studied.

SOPHOMORE YEAR.

In the case of students in the Scientific Course, the study of Latin closes with the Freshman year. The Classical students and those pursuing the Literary Course, who elect Latin instead of advanced Biology, study during the first term of the Sophomore year the Odes of Horace. The attention now is directed to the literary and rhetorical features of the work read. Comparative study is introduced. Scanning, which was begun in Virgil, is here resumed and the various versification of the Odes is carefully studied. Selections are memorized, choice being made of those which illustrate the poet's finest thought and favorite meters. Mythological and historical references are investigated.

SECOND TERM.—During the second term, the Satires of Horace, including Ars Poetica, are studied. Roman Geography, improvements, modes of travel, books, libraries, etc., indicate the line of investigation followed.

The study of Roman Literature is introduced. Wilkin's Primer of Latin Literature and Kelsey's Topical Outline are followed as guides; the literatures of Simcox and Crutwell are books of reference.

Topics are assigned for investigation in the Library, and oral or written reports are made by the pupils.

THIRD TERM.—During the third term, the Agricola and Germania of Tactitus are read, offering the student an opportunity to study in the one, a specimen of Latin Biography, in the other, to contrast the simple living of the Germans with the intricate life of the Romans.

HEBREW.

During the Senior year, the Classical students may elect Hebrew. Four recitations per week are offered. Harper's Manual, and Elements of Hebrew, are the text books used. The first forty lessons of the Manual are followed closely. Other passages are read as time permits. The aim is to acquire a working vocabulary, master the principles of the language and prepare for future exegetical and critical study of the Bible.

TEXT BOOKS.

During the past year the following, in addition to those previously named, were used: Allen and Greenough's Grammar, Pennell's History of Rome, Johnston's Cicero, Riggs' Composition Part II, Chase and Stuart's Horace, Hopkins' Tacitus; Smith's Classical Dictionary is a required book of reterence.

ENGLISH LANGUAGE AND LITERATURE.

In the first term of the Freshman year, a careful study of the principles of Rhetoric is made. The work in the text book is supplemented by frequent written exercises and the student is taught to express his thoughts clearly and effectively.

A portion of the second term is given to Trench's Study of Words. During the last half of the second year, students in the Classical and Scientific Courses will study Paradise Lost, two books, some of Milton's shorter poems and selections from Macaulay's Essays.

Two lessons a week, throughout the Junior year, are given to a general survey of the history of English literature and the study of its historical development. In connection with this work, typical selections from representative authors are studied. The aim is to create a taste for what is purest and best and to direct attention to the boundless riches stored up in our literature.

The second and third terms of the Senior year are devoted to Shakespeare. A critical study of a number of his plays is made, the reading of others is required, and to each student one play is assigned for character study, upon which a carefully prepared essay is to be written.

GREEK.

The aim in this Department is to cultivate habits of attention, accurate observation, close reasoning and correct and vigorous expression; to give some idea of the wealth of thought here awaiting the earnest seeker, and to show something of the historical development of this people, whose language, literature and art have entered so largely into modern thought and modern progress.

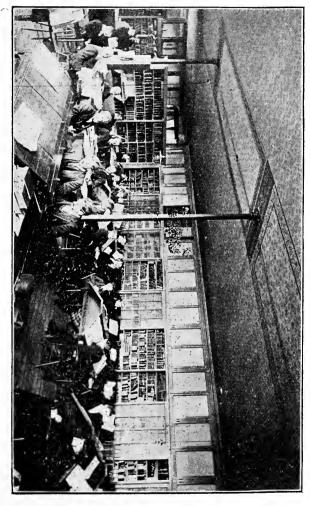

Including the Preparatory, there is a four year's course, daily recitations.

In the Freshman year, the Anabasis is continued until it is read with a good degree of ease and appreciation.

The Grammatical work is a review of inflections and a study of Syntax, making special investigation of the principles of Conditional Sentences and Indirect Quotations. In connection with the narrative, Greek Character is studied in the light of its versatility, reasonableness and endurance.

The Orations of Lysias afford an excellent opportunity for an examination of the Athenian Legislative and Judicial Systems.

In the Sophomore year, in connection with the Memorabilia of Socrates, Greek home life is investigated, also their views of morals and

WARREN COUNTY LIBRARY.

religion, marking in these lines the highest attainment of the human mind unaided by Divine revelation.

In Demosthenes, the structure and logic of the oration are studied and the source of the orator's power over men is sought in his earnestness, honesty of purpose and intense patriotism.

In Grecian History the endeavor is to fix in the mind leading facts and to study these facts in their philosophic relations.

In the Junior year, Demosthenes is continued and Plato with Greek Philosophy is studied. The course closes with the reading of a Greek play; last year Alcestis, this year Prometheus Bound.

MATHEMATICAL DEPARTMENT.

The course of study in pure Mathematics is planned so as to be of the most benefit to the greatest number of our students. This course is absolutely needful for thorough understanding of the ordinary college text books of Natural Philosophy, Astronomy and Mechanics. It is taught so as to be of great advantage in forming habits of mental accuracy, of clearness of statement and of logical methods in reasoning and investigation. While a sound foundation is laid for advanced Mathematical work, students are especially prepared to understand those practical principles and problems which are most likely to be met with in their other studies, or in daily affairs, or in teaching. Throughout the course clearness of method and accuracy in results are deemed of essential importance. Oral instruction is constantly given on points not in the text books.

Geometry is thoroughly studied. Its practical applications are taught. It is also made very valuable for mental discipline. For this purpose the Euclidean methods, which have been so long deemed of the highest educational value, are combined with modern presentations of the subject. Algebra and Geometry are used in connection. Practice is given, not merely in recitations from the text book, but also in devising proofs and tests. Many original demonstrations and solutions are required. The propositions which are practically most useful are especially studied and illustrated with numerical questions and graphical measurements.

A brief course in Trigonometry gives the student the essential elements needed to understand Astronomy and Physics. All the most useful principles of the mensuration of lines, surfaces and solids are thoroughly studied. These are applied to numerous problems. Logarithms are applied to calculations of all kinds, not merely to triangles.

Those desiring to study Civil Engineering and to learn the use of instruments, have the option of receiving instruction from a practical engineer and surveyor.

A Review of Mathematics, during the first session of the Sophomore year, covers more difficult work in Arithmetic, Algebra, Geometry and Mensuration. These subjects are studied in their relations to each other, their history and their more important obstruse applications. Many problems, new and old, of note or of special interest are discussed. Mere mathematical puzzles are avoided. Work is restricted to problems which illustrate important principles or useful methods of computation and solution. This review can to no extent take the place of prescribed previous work in these subjects. It requires full preparation.

Analytical Geometry is studied to the extent of acquiring the elements of the system and the most important properties of the conic sections, the spirals, the cycloids and other curves which occur in nature or are used in the practical arts. Concrete examples of these curves are constantly considered as well as the abstract theory. The graphical representation of variable facts and statistics by means of lines is

explained.

Calculus is briefly studied, so as to understand the method of the modern analysis and its application to problems in Curvature, Maxima and Minima, and to the universal methods of determining the Measurement of curves, surfaces and solids.

The works of Prof. Loomis have been in use. Next year the following will be used: Chauvenet's Geometry, (Byerly ed.) Newcomb's Essentials of Trigonometry, Ellwood's Table Book and Test Problems, Hardy's Analytical Geometry and Hardy's Calculus. Students are expected to retain for reference and for use in recitation, throughout this course, their previous mathematical text books.

ECONOMICS, CIVICS AND PHILOSOPHY OF RHETORIC.

- I. Political Economy.—The work of instruction in this subject aims to accomplish two main results. First, mastering the essential facts and leading principles of Economics, grouped under the four general heads, Production, Exchange, Distribution and Consumption. Second, the application of some of these principles to present problems. The aim is to train the student to such a knowledge of the subject as will fit him either for pursuing advanced courses in the Science, or more intelligently to study Social and Economic questions as a private citizen. The training process is by means of text book (Francis Walker's,) active class discussions and special reports, usually oral, on Topics assigned. The student is encouraged to investigate and think for himself.
- II. CONSTITUTIONAL LAW.—This study is pursued by the Junior class in the third term. The object of the instruction is to present to

the student a clear exposition of the great principles of the Constitution, the process of their growth, and the Legislative provisions in which they have been embodied. Andrews' Manual of the Constitution is used as a basis of study. This is supplemented with explanations, class discussions and special reports on subjects involving Constitutional questions.

III.—ADVANCED RHETORIC.—The Junior class in all courses are required to study this subject fourteen weeks in the first term, five days a week. Whately's Rhetoric, and Gilmore's Outlines, are made the basis of the study. Argumentative Composition is made prominent. Making plans in the class room, without opportunity for previous preparation, is practiced. Each pupil is required to present a critical analysis of some Masterpiece of Oratory, Outlines of Argument, and a carefully prepared Argumentative Essay. A course of lectures on Oratory is delivered by the Instructor.

ETHICS AND EVIDENCES OF CHRISTIANITY.

- 1. Ethics is taught the first term of the Senior year, eight weeks, five hours a week. The instruction in this subject is conducted by recitations from text books and comments made by the instructor. Full and intelligent discussion in the class room is encouraged. The aim is to lead every student to a voluntary acceptance of the Moral Law as his guide in life, not by dogmatic assertions of any theory, but by an unbiased and intelligent study of the fixed and eternal principles of right.
- 2. EVIDENCES OF CHRISTIANITY is pursued by the Senior Class during the first term, eight weeks, five hours a week. The aim is not to cover the whole ground in the short time allowed, but to make a study of the topics most vitally related to the subject of Christian evidences. The personality of Christ is made the central argument. A comparative study of the other great historic religions of the world is made by the assignment of special topics for reports and reviews.

HISTORY.

GENERAL HISTORY is a required subject of the Sophomore Scientific and is elective with the Junior class of the Literary course. It is pursued throughout the year, five hours a week. Myers' General History is used as a text book. The Stream of Civilization is followed from its rise down to the present time. The contribution of each nation to the world's advancement is noted and the formation and growth of the modern states is carefully traced. As a knowledge of Geography is essential to a profitable study of history, maps are in constant use in

class room work and the use of the historical atlas is required of the student in the work of preparation. Topics are assigned for special study, reports of which are made to class orally or in writing. The chief object aimed at is to equip the student with a clear outline of history as a foundation for more advanced study or intelligent general reading.

ENGLISH HISTORY.—Students in the Classical and Literary courses take English History during the first half of the second year.

GERMAN.

German is offered in the Junior and Senior years to all those pursuing either the Scientific or the Literary course. Students may, however, elect German, Latin, or History in the Literary course.

The aim of the first year's work in German is to give the student a thorough drill in pronunciation as well as a practical knowledge of the grammatical construction and idioms of the language. Varied selections, prose and poetry, from standard authors are translated, and exercises in conversation and composition given throughout the year. The natural and grammatical methods of instruction are combined so as to secure the best practical results.

The aim of the second year's work will be to widen the literary as well as the conversational vocabulary of the pupil and to acquaint him, through translation, with standard works of classical German authors. Lectures upon the History of German Literature will be given by the instructor in charge of Department.

The following text books will be used: The Joynes-Meissner German Grammar, Joynes's Reader, Schiller's Wilhelm Tell, Goethe's Hermann and Dorothea. Other texts to be selected.

ELOCUTION.

The aim of this department is to make natural and effective readers and speakers, and to develop as far as possible the individuality of the student. "Not imitation, but creation, is the aim." Students in all courses are entitled to one recitation per week in Elocution during the Sophomore, Junior and Senior years.

The first year's work includes free gymnastics, with a special view to chest development, exercises in breathing and vocal culture, and drill in articulation and enunciation, followed by critical study of various selections from English Literature. Individual work is also required of each pupil, who thus has the advantage of special criticism.

In the Junior year, vocal and physical culture is continued, and work in gesture begun, some attention being given to the Delsarte system. Individual performances are required and special study is given to oratorical selections.

In the Senior year more advanced work is taken up along the same lines. Study is given to the philosophy of expression and the principles of Elocution. Dramatic selections are analyized and work in gesture continued. Some attention is given to the reading of the Scriptures.

The regular course of instruction, including personal training for all public exhibitions required of the students by the college, is furnished without extra expense to the student. A limited amount of special instruction can be secured by the student at a moderate cost.

"Cumnock's Choice Selections" will be used as a reader. Other texts furnished by the instructor in charge of Department.

BIOLOGICAL DEPARTMENT.

MATERIAL EQUIPMENT.

This department was organized at the beginning of the present year. The laboratory is supplied with compound microscopes, dissecting microscopes, microtomes, water baths and other appliances for the study of animal and vegetable tissue. Fifteen Leitz' microscopes of convenient laboratory form, and one large and very complete Leitz' was imported during the year. Also one Zeiss' Paul Mayer dissecting microscope. Extensive additions will be made next year. Desks and apparatus are provided for eighteen students in the laboratory. A few good models and illustrative specimens are possessed by the college. It is not desirable to build up a museum of curious things, but a well selected collection of typical animal and vegetable specimens and models will be brought together as rapidly as circumstances will permit.

COURSES.

The instruction in this department includes:

- 1. General Biology.—Fall and winter terms; required of candidates for B. S. and B. L. in their Freshman year and open to candidates for A. B. in their Senior year.
- 2. ELEMENTARY BOTANY.—Last half of year; required of candidates for A. B. in their Freshman year.
- 3. ELEMENTARY BOTANY AND VEGETABLE HISTOLOGY.—Spring term; to follow the course in General Biology.
- 4. ZOOLOGY AND EMBRYOLOGY.—Winter and Spring terms; required of candidates for B. S. in their Sophomore year and open to candidates for B. L. in their Junior year.

5. Human Physiology.—Last half year; for students in the preparatory department.

It is the aim in the biological department to bring the student into direct contact with nature. Living things are studied, not books about living things.

GENERAL BIOLOGY.

In the course in General Biology the object is to give a clear conception of the nature of living matter, the cell, protoplasm, the building up of tissues and of organisms and to present a rational basis for classification. The instruction is by lecture and laboratory work, especial stress being laid upon the latter. A few typical animals and plants are studied with considerable thoroughness. The student records the results of his work by notes and drawings. In the present year the forms selected were the earthworm, hydra, vorticella, amœba, yeast plant, protococcus, moulds, mushroom, fern, flowering plant, crayfish and pigeon. The course will vary from year to year. No text book is used. The method is essentially that indicated in Huxley and Martin's Biology.

BOTANY.

The course in Elementary Botany is intended to give the student some conception of the relations and properties of plant life. The flowerless plant receives attention as well as the flowering plant. Structure and development are studied practically in the laboratory. The work is such that it can be taken up without previous botanical study, but some preliminary training is desirable. The so called "analysis" of plants is in no sense a substitute for this course.

The Elementary Botany and Vegetable Histology course continues the methods begun in the General Biology. Bessey's Botany and Gray's Manual are used.

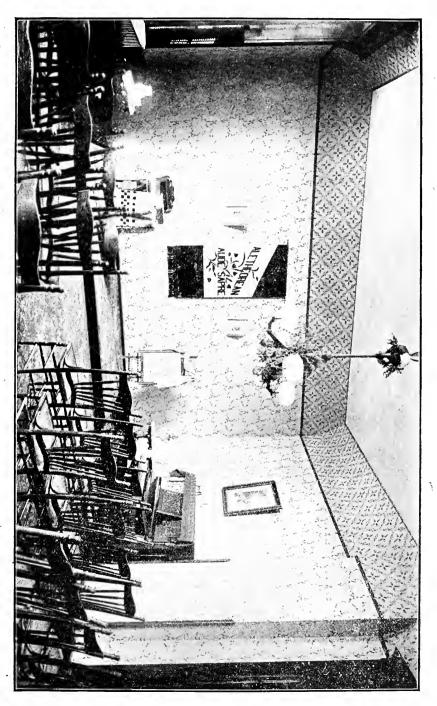

ZOOLOGY.

The course in Zoology and Embryology continues in a more systematic way the work begun in the General Biology. Fuller opportunity will be given for attaining skill in microscopical technique. In the spring the embryology of the chick will be studied in the laboratory and by the aid of lectures and reference reading.

BROOKS' HANDBOOK OF ZOOLOGY and FOSTER AND BALFOUR'S EMBRYOLOGY are recommended.

GEOLOGY.

This is studied the first half of the Senior year. The college cabinet contains a considerable amount of material for illustration. Winchell's Geological Studies is the text book.

DEPARTMENT OF PHYSICIAL SCIENCE.

At the beginning of the present college year the Department of Natural Science was divided. A Department of Biology and a Department of Physical Science were established. The Department of Physical Science includes the subjects Physics and Chemistry.

PHYSICS.

During one college year the Classical and Scientific Juniors pursue a course in Physics. It is the aim to develop the study in such a way as to give the student a practical, as well as a theoretical knowledge of the subject. So far as possible there is made an experimental study of the phenomena of natural laws. The apparatus possessed is of good quality. A fine air pump affords facility for studying the tension of gases. Special attention will be called to the action of the electric current upon highly rarefied gases. Many of the phenomena of Optics are illustrated by a solar lantern and on cloudy days the necessary light may be obtained from a large oxy-hydrogen lantern. Particular attention is invited to the subject Electricity. A Rhumkorff Coil and Toepler Holtz Machine afford a practical study of electrical induction. A Wheatstone Bridge and Resistance Set, with range of measurement from 1-100 to 111,000 ohms, and a large Tangent Galvanometer have recently been Careful attention will be given to the determination of resistance and the measurement of voltage and amperage.

CHEMISTRY.

The course in Chemistry extends throughout the Sophomore year. The instruction will be partly by lecture, partly by text book. The endeavor is to impart a thorough knowledge of the principles of Chemistry. The student is drilled in the writing of formulas and is gradually led to the discovery of the relative affinities of the different elements. An elective course in Elementary Qualitative Analysis is also offered. Special study is given to the detection of the metallic radicals and to the analysis of ores. A well equipped laboratory affords accomodation for fifty students. Each student is given a desk furnished with apparatus and reagents. In General Chemistry, laboratory work of three hours per week throughout the year is required. In Analytical Chemistry, the same amount of laboratory work per week is required during the time the subject is pursued. A fine Spectroscope, according to Kirchoff and Bunsen, with Schellen's Universal Holder, has recently been imported and facility is thus afforded, not only for making the analysis of light, but also for studying Spectroscopic Analysis. Although as yet no course in Quantitative Analysis exists, a few experiments will be given illustrating the general methods of volumetric and gravimetric determinations. A pair of Troemner's Balances with agate bearings and sensitive to ¼ milligramme, affords means for fairly accurate work.

ASTRONOMY

The subject Astronomy is at present in charge of this Department. As means allow, additional apparatus are purchased for the illustration of chemical and physical laws. The endeavor has been to study nature not from books alone, but in the light of independent, individual investigation. The careful methods and the habit of accurate thinking which are engendered by an honest, conscientious study of nature and her phenomena, have rarely been over-estimated.

PREPARATORY DEPARTMENT.

Careful preparation, under competent instructors, is necessary for the work in higher classes. To furnish this in the best manner Monmouth College maintains a well equipped preparatory department.

The special object of this department is to prepare students thoroughly for entering the Freshman Class. The course is arranged with reference to the various departments in the college course, and the studies pursued have direct bearing upon the work which follows. Thus time is economized and the preparation unified.

Parents can send their sons and daughters here with the perfect assurance that they will be cared for and trained in the essential branches which will prepare them for the Freshman Class.

The course embraces two years for pupils who are well prepared. Twenty recitations per week is the required work. For such as are not well established in English and Arithmetic the course requires three years.

CONTROL.

The Department is under the general superintendence of the President and Faculty, and the special supervision of the Vice President. The instruction is in charge of the Professor at the head of each of the various Departments in College.

ADVANTAGES.

All advantages in the way of Libraries. Literary Societies. Laboratories. Lectures, Christian Union, and other features of the Collège, are open to the pupils in this Department.

ENGLISH DEPARTMENT.

There are many young men and women who have not the time, means or inclination at present to pursue a thorough course of training, who, nevertheless, desire a good English education coupled with the advantages of College associations. For this class we have provided the best facilities possible in our

ENGLISH COURSE.

This course, as its name suggests, is restricted to the English language. It offers training in the Departments of English. Science, History, Civics and Mathematics. Such a course is calculated to create a desire in the student pursuing it for future study and higher training. Its design is to furnish a practical education and prepare young men and women for business. It furnishes teachers a favorable opportunity to prepare themselves for higher and better positions. It offers excellent facilities to any who are wishing to prepare to enter regular classes, but who feel the need of a fuller acquaintance with the common school branches. Admission to this Department is gained in the same manner as to the Preparatory. It has the same advantages and is controlled as the Preparatory Department.

TOPICAL STATEMENT OF WORK OFFERED IN THE PREPARATORY AND ENGLISH DEPARTMENTS.

ENGLISH.

In the first year, one term is given to the study of Grammar, including work in Analysis. In the first half of the second year, Elementary Rhetoric is studied and the principles are enforced by illustrations and practice in writing. The aim is to enable the pupil to acquire a habit of clear and correct expression. In connection with this work is the careful study of some of the American authors.

LATIN.

FIRST YEAR—JUNIOR PREPARATORY.—The Roman pronunciation is used throughout the course. The inductive method is followed and the language is taught from the text of Cæsar. Within the first year an accurate pronunciation, a good working vocabulary, a thorough mastery of inflections and a comprehensive knowledge of the government of words in the sentence is acquired. Daily practice is given in writing Latin, in answering, in Latin, questions based on the text and in translating Latin on hearing. The year's work is confined to the First Book of Cæsar.

SECOND YEAR—SENIOR PREPARATORY.—Cæsar and Virgil are read. In Cæsar, close attention is paid to Syntax. Latin composition is required. A study of the Roman camp, fortifications, weapons, army, geography, etc., is made.

In Virgil, Latin Prosody claims attention. Ready scansion of the Dactylic verse is required. Figures of Speech are studied. Mytholog-

ical references are explained.

BOOKS REQUIRED.—Allen and Greenough's Grammar, Harper and Burgess' Latin Primer, Harper and Tolman's Cæsar, Harper and Miller's Virgil, Rigg's Composition Part I, Smith's Classical Dictionary.

GREEK.

Greek is begun in the Senior Preparatory—second year. Harper's Inductive Method is used, special attention being paid to forms, grammatical structure and the acquirement of a vocabulary.

HISTORY, CIVICS AND ECONOMICS.

United States History is pursued by the Junior Class the entire year, four recitations a week. Johnston's text book is used as a basis. Maps are freely used. Frequent tests are required in writing. Direction is given in collateral reading. Growth in territory, population, industry, wealth, influence, etc., is carefully traced out. Causes and results of war are made prominent. The aim is to fix in the mind of the student a clear outline of our history as a nation.

CIVICS AND ECONOMICS.—The same class studies Civil Government in second term and Economics the third, five days in a week. Dole's American Citizen is the text book used. Recitations required by topics. The object is the mastery of fundamentals and laying of a foundation for advanced work in the College course.

MATHEMATICS.

Students entering the Preparatory Classes should be well acquainted with Arithmetic in all its ordinary applications. Without this knowledge failure is likely in more advanced work.

Algebra is studied for one year and a half. The following subjects are considered most important: Ordinary operations with Polynomials and with Fractions, Factoring, Simple and Quadratic Equations of one or more unknown quantities, Radicals, Proportion, Progressions, Permutations, and the applications of the Binomial Theorem. The solution of numerous concrete problems and the use of tests and proofs accompanies the entire study. A brief outline is given of the Higher Equations and considerable time is spent on the applications of Algebra and on the use of Logarithms in ordinary computations and in the solutions of problems in Interest and Annuities.

Plane Geometry is studied in the Preparatory Department during one half year. It is essential that it be so mastered that demonstrations can be given accurately and that the student can apply the principles learned to Theorems, Problems and Numerical Computations not explained in the text book. Wentworth's shorter course in Algebra is used during the first year. Bowser's College Algebra and Chauvenet's Geometry will be used during the second year and retained for use in the College classes.

PHYSIOLOGY.

This subject is studied during the last half of the Senior Preparatory Year. The instruction is arranged to give training and mental discipline as well as useful information. The work is made thoroughly practical. The human skeleton is studied in the laboratory. Other laboratory work is given. The student learns to see with his own eyes—to gain some knowledge that is not second hand. Hygiene is viewed not as a mass of rules, but as logical deductions from natural laws.

MARTIN'S HUMAN BODY (briefer course) is the text book.

PHYSICAL SCIENCE.

During the fall term the Senior Preparatory Scientific and English pursue a course in Physical Geography. This serves as a general introduction to subsequent scientific study. The text book used is Houston's New Physical Geography. During the Winter and Spring Terms the same Class follows a course in Elementary Physical Science. By an experimental study the student becomes conversant with the general principles of physical phenomena.

AMATEUR DES BELLES LETTRES HALL,

Musical Department.

Owing to the widely spreading interest in Music in general and the frequent demands for it in connection with the College course, the Senate and Faculty have established a Musical Department in Monmouth College.

The success that has been attained in this department since its opening unmistakably proves the wisdom of the Board in establishing it.

Prof. E. C. Zartman has been chosen Professor and Director of the Department. Prof. Zartman was for some years a pupil of the late Prof. Karl Merz. Musical Director of Wooster, Ohio, and under the direction of this eminent instructor and author attained a high degree of culture in his chosen field of labor. Prof. Zartman will devote his whole personal attention to the giving of lessons to pupils and looking after the interests of this Department.

It is not the intention to teach Music merely as an ornamental branch, but to make it a part of a complete education, a higher culture. Hence, with this idea in view, Music has been placed on an equality with other studies in the curriculum.

The following branches will be taught: Piano-playing, Organ-playing, Cultivation of the Voice, Chorus Singing, Harmony and Musical Composition.

Those desiring private instructions will be accommodated; however, the class system, being long recognized as highly beneficial in its results in other schools of music, has been introduced here.

By this means the cost of musical instruction is brought within reach of persons of limited means, and it is also found that the corrections made for the benefit of one pupil prove likewise beneficial to the others in the class. To play and sing before others is quite a trial for many pupils, and in this the class is found valuable ln overcoming this diffidence. It also excites a friendly rivalry that is both stimulating and healthful. Two pupils are considered a class. A musical education is two-fold—an accurate technic must be acquired, and a correct taste developed; hence close attention will be paid to technical studies, while the best works of the masters will be introduced as the progress of the pupil may require.

Plano forte.

The great diversity of talent, the ultimate object in the study of music, and the various stages of acquirement of pupils, render it impossible to lay down a course adapted to all pupils. However, the studies

or their equivalent, as given in the course below, will be pursued in connection with as many of the principal works of the best Classical, Romantic and Modern composers as it is possible to study thoroughly, with a correct execution and interpretation, in the time necessary for the completion of the course.

First Year.—Mathews's Graded Course of Studies, Vol. I; Six Easy Studies, op. 314, De Kontski, together with pieces suitable to this grade.

Second Year.—Mason's Touch and Technic; Melodious Studies, op. 52, Book I. Loesschhorn; Intermediate Degree, op. 66, Book I, Loesschhorn; Studies, op. 29 and 32, Bertine; Mason's Accentuated Scales and Arpeggios; Matthews's Phrasing Studies, Book I.

Third Year.—Krause, op. 2, Book I. (Trill Studies.) Czerney School of Velocity, op. 299, Books I, II; Bach's Two and Three-Part Inventions; Czerney and Kullak's Octave Studies.

FOURTH YEAR.—Tausig's Daily Studies, Book I; Studies from Cramer. (Von Bulow edition); Selections from Bach's W. T. C.; Select Etudes from Raff, Henselt and Chopin.

To complete this course satisfactorily requires four years of faithful study by the pupil of average ability. During this course Harmony and Composition must be studied two years, and History, one year.

VOICE CULTURE.

The study of vocal music ought to commend itself to pupils of every institution of learning. Aside from being an agreeable diversion in the home circle, as well as a highly desirable accomplishment, it is well known to be beneficial to all, as it is a healthful exercise; for by its judicious daily practice the lungs are expanded and the vocal organs strengthened. Students in this department will be taught the correct management of the breath, tone placing, sustained tones, and at the same time securing agility and flexibility of the voice. To this end will be used Lablache or Panseron's methods, supplemented by studies from Concone, Abt's vocalises and solfeggios, etc. 'The German Lied, the Italian Aria, the sacred song as well as the ballad, will all receive attention. The length of the course depends upon the difficulties in the voice to overcome, but is in its extent somewhat like the piano course.

HARMONY.

Emery's Harmony will be the text book, supplemented by Emery's Additional Exercises.

HISTORY.

Ritter's text-book will be used, supplemented by the biographies of the Masters. Beethoven and Mozart, and Mendelsshon's Letters, Merz's Hints, Fillmore's History of Piano Music.

CHORUS SINGING.

It is found that chorus singing cannot be carried on with any degree of success in Colleges and Seminaries admitting but one sex, but in a co-educational institution like our own the facilities for chorus singing having already proven themselves ample, Persons entering the Chorus Class are charged a nominal fee which barely defrays incidental and other expenses connected with the class.

CONCERTS AND RECITALS.

Recitals, to which the public is cordially invited, are given from time to time by the pupils of the department. It has been the custom in the past to give a concert as a part of the Commencement exercises at the close of each college year. This custom will be continued.

REQUIREMENTS FOR GRADUATION.

A diploma will be given to all those who have spent at least one year in our institution, and have finished the prescribed course, including the work in Harmony and History.

MISCELLANEOUS ITEMS.

Students may enter at any time but are not enrolled for less than one term.

Pupils should report to the President of the College, with whom they will make all their arrangements for entrance.

The privileges of the Musical Department are not extended on the same grounds to holders of scholarship and half-rate tuitions, as are the the privileges of the other departments of the College.

All persons who have studied music, will, upon examination, be allowed to enter the course for graduation at the point where their proficiency will admit.

Two years of music will be accepted for German.

Students attending College and desiring to receive instruction in music, are expected to take lessons from the Professor and Director of the Department.

No student connected with the institution will be credited with lessons taken elsewhere except by special permission of the faculty.

RATES OF TUITION.

, Tuition per session payable in advance, two lessons per week.

FALL SESSION-SIXTEEN WEEKS.

In Classes—Piano and Voice Culture and Harmony, each	318 00
Private Lessons—Piano and Voice Culture and Harmony, each	27 00
Harmony, in classes of six	6 00
History of Music	3.00

WINTER SESSION-TWELVE WEEKS.

In Classes—Piano and Voice Culture and Harmony, each\$14 00	,
Private Lessons—Piano and Voice Culture and Harmony, each 22 00	
Harmony, in classes of six 5 00	
History of Music	

SPRING SESSION-TEN WEEKS.

In Classes—Piano and Voice Culture and Harmony, each\$12	00
Private Lessons—Piano and Voice Culture and Harmony, each 18	00
Harmony in classes of six	00
History of Music 3	00

All classes are of three-fourths of an hour each; private lessons are three-fourths of an hour each. Good pianos and organs can be rented at the expense of the pupils, or they may bring their own instruments if they prefer.

Text Books and Books of Reference.

The right is reserved to change at the beginning of a subject, any text book.

Ethics.—McIlvaine's Evidences of Christianity, Wayland's Moral Science.

NATURAL SCIENCE.—Remsen's Chemistry, Young's General Astronomy, Winchell's Geological Studies.

LATIN AND HEBREW LANGUAGES.—Allen & Greenough's Latin Grammar, revised edition; Johnston's Cicero, Chase & Stewart's Horace, edition of 1892; Hopkins' Tacitus, Harper's Hebrew Grammar and Manual, Riggs's Latin Composition, Smith's Classical Dictionary.

GREEK LANGUAGE.—Goodwin's Greek Grammar, revised edition, Goodwin's Anabasis with White's Vocabulary, Anthon's Memorabilia, D'Ooge's Demosthenes, Whiton's Lysias, Dyer's Apology and Crito, Prometheus Bound, Myers' Grecian History, Liddell & Scott's Intermediate Greek Lexicon.

MATHEMATICS.—Bowser's College Algebra, Chauvenet's Geometry, Newcomb's Essentials of Trigonometry, Ellwood's Test Problems, Hardy's Analytical Geometry and Calcubus.

GERMAN.—Joynes-Meissnor German Grammar, Joynes German Reader, and other selections from German Literature.

Philosophy.—Bowen's Hamilton, Jevon's Logic, Whately's Rhetoric, Francis Walker's Political Economy, Andrew's Constitution of the United States, revised edition.

ENGLISH LANGUAGE.—Shaw's New English Literature, Hart's Composition and Rhetoric, Trench's Study of Words, Montgomery's English History, Myer's General History.

ELOCUTION.—Cumnock's Choice Readings, Murdock's Vocal Culture.

PREPARATORY.

Allen & Greenough's Latin Grammar, revised edition; Harper & Burgress's Latin Method, Harper & Tolman's Cæsar, Harper & Miller's Virgil, Riggs's Composition, Reed & Kellogg's English Grammar and Composition, Wentworth's Shorter Course Algebra, Dole's Science of Government, Wentworth's and Bowser's Algebras, Chauvenet's Geometry, Goodwin's Greek Grammar, Harper & Water's Greek Method, Joynes-Meissner's German Grammar, Joynes German Reader, Martin's Human Body, Johnston's United States History.

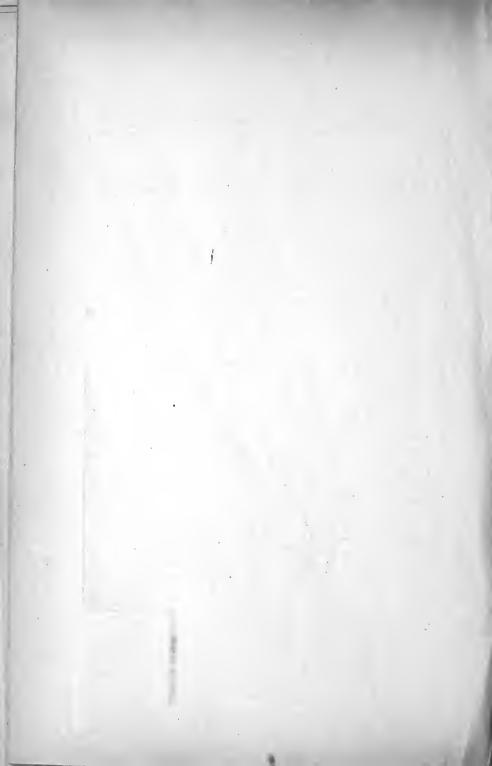

SPECIAL COURSE.

I. The Special Course includes nine departments, in one or more of which a student may graduate with Honors, first or second, according to the attainments made. These Honors are in no sense competitive. As many as complete the course receive them.

The departments of the Special Course are as follows:

- II. 1, Christian Ethics; 2, Philosophy; 3, Natural Science; 4, English Literature; 5. Mathematics; 6, Greek Language and Literature; 7, Latin Language and Literature; 8, German; 9, History.
- III. Students will not be admitted as candidates for Honors in Greek, Latin. Mathematics, or German. later than the second term of the Sophomore year: in Natural Science. English Literature. or History, later than the first term of the Junior year; in Philosophy or Christian Ethics, later than the first term of the Senior year.
- IV. No student will be admitted to examinations for Honors unless the average of his recitations and examinations in each subject the term preceding shall be 8.5.
- V. In general, not exceeding one-half as much matter in addition to the amount required in the ordinary course, in any of the above departments, must be mastered in order to a second Honor; and an amount equal to that required in the ordinary course in order to a first Honor.
- VI. Honor examinations will be held the first week of each vacation, Senior included, at which candidates for the degree of A. B. or B. S. may present themselves, and those passing in any subject in any Department shall be credited with the same. In case of every candidate, the result of all the examinations will determine the Honor attained.
- VII. Alumni may in like manner present themselves for examination in any of the departments named above, at any honor examination, and those passing in any subject will be credited with the same.
- $\ensuremath{\mathrm{VIII}}.$ The result of all these examinations will be entered on the College Register.

PHILADELPHIAN HALL.

Regulations of the Senate.

I. The Statutes of the College, Chapter ii, Section 3, provide that "No student shall be permitted to enter at a later period of the course than the commencement of the first session of the Senior year." The spirit of this law, in the judgment of the Faculty, requires at least one full year's attendance of a student on the exercises of the college in order to graduation. Under no circumstances will this rule, as thus interpreted, be relaxed while the above statute remains unrepealed.

II. The Senate has adopted the following as an additional chapter to the College Statutes:

Section 1. All persons matriculating shall be regarded as students, and on payment of the required fees shall be entitled to all the privileges of the College.

Sec. 2. Connection with the College is terminated by graduation or dismissal, honorable or otherwise.

SEC. 3. The privileges of the student shall be suspended in all cases of failure to pay the required fee and attend on instruction. Provided, however, that the following privileges, namely, that of examination with his classes, active membership in the societies, representing societies and classes on public performances, and the use of the library and reading room, may be granted to students temporarily absent, for a period not exceeding one year, on written permission from the Faculty, and the payment of two dollars per term.

Sec. 4. All persons enjoying any of the above privileges shall be subject to college discipline, the same as if in actual attendance.

III. At the meeting of the Senate in June, 1874, the following was added to the Statutes of the College as Section 4 of Chapter xii:

"It shall be unlawful for any student of the College hereafter to become a member of any secret college fraternity, or to connect with any chapter of any such fraternity, and also for any active member of any such fraternity to be admitted as a student of this College."

Special Regulations.

- 1. No student should enter the Freshman Class of either course until fully up with it.
- 2. All students should take one of the prescribed courses and pursue it regularly; but those not wishing to do so are permitted to select such subjects as they are competent to study, and can recite with regular classes, provided that they pass the examination which would entitle them to pursue the subject if in a regular course.
- 3. All the students are required to attend the worship of God in the chapel daily, and to recite a Bible lesson weekly. Students in the Classical and Scientific Courses will study select portions of the Scriptures, in addition to the usual text books on Moral Philosophy and the Evidences of Natural and Revealed Religion. The President will give frequent lectures on manners, morals and religious duties, intended to train the students to the life of Christian ladies and gentlemen. All who do not reside with their parents are required to attend public worship and Bible class in some church on the Sabbath. Students' prayermeetings are maintained and well attended. The Students' Christian Union, an association of students and professors for the promotion of their spiritual welfare and the cause of Christ in the College, holds regular monthly meetings on the first Sabbath of each month. The Faculty regard it as an important, part of their work to labor for the moral and spiritual welfare of the student.

DEGREES.

The degrees B. A., B. S., B. L. and B. M. are conferred after the satisfactory completion of the respective courses.

A certificate of attainments will be given to those who complete and pass satisfactory examinations in the English Course.

The Masters' degrees are open to Bachelors of this institution or of any other college of equal rank upon the following conditions:

1. Candidates may receive a Master's degree, pro merito, three years after graduation upon passing a satisfactory examination in one major and one minor subject. These studies are to be chosen under the advice of the head of the department in which the major part of the work is done, by whom also the examinations are conducted. A thesis must also be presented as early in the year as the first of May on a theme connected with this study, embodying results of careful investigation.

2. Candidates may receive a Master's degree upon presenting satisfactory evidence of having pursued a professional course, such as a certificate of graduation from a Theological Seminary, Law School or Medical College, and by submitting a thesis on subject connected with such a course of study, embodying results of careful investigation and advanced work. This degree may also be conferred upon those furnishing a certificate of one year's satisfactory graduate work done in an accredited University.

Those desiring a Master's degree must make application to the President at least one month before Commencement, and deposit a fee of \$6.00 with the Treasurer.

In regard to grading, examinations and promotions, the following principles have been adopted:

- 1. Each recitation is marked on a scale of 10; ordinary excellence being indicated by 9, extraordinary by 10. No student whose average recitation grade falls below 7 is entitled to examination with his class. The actual attendance is marked on the same scale. To be marked ten in attendance the student must be present at every roll-call of his class.
- 2. Each class is examined on each subject as soon as completed. The examination of each student is marked on the same scale and entered on the Annual Record. To pass, the student must answer correctly at least 70 per cent. of all questions asked him. No student is credited with any subject until he has been examined and passed in it. The student's Final Grade in any subject is determined by adding his examination grade to twice his average recitation grade and dividing this sum by three.
- 3. The Grand Average of the marks received in all the subjects in which the student has been examined and passed with his class during the year, and the marks for attendance during the same time, determines the student's rank in his class. This is entered on the Annual Record.
- 4. The Salutatory and Valedictory, on Commencement Day, are delivered, the former by the Senior Scientific, the latter by the Senior Classical, who ranks highest.
- 5. If any student shall be admitted after the beginning of a session and before the middle of it, he shall pay the fee accruing on the whole session. If admitted at or after the middle of the session he shall pay half thereof.

REPORTS.

Reports are sent to parents or guardians at the close of each term. The President should be notified of every case where report fails to come within ten days after the close of the term.

CLASSIFICATION.

The rank of each new student is determined by balancing his credits and deficits, but in promotions the students' credits and deficits are not balanced.

Junior Preparatory students are advanced to Senior Preparatory rank if they have no entrance conditions and not more than ten months back work in Junior Preparatory.

Senior Preparatory students are advanced to Freshman rank if they have no Junior Preparatory conditions and not more than ten months back work in Senior Preparatory.

Freshmen, Classical and Scientific, are advanced to Sophomore rank and Freshmen, Literary, to Junior rank if they have no Preparatory conditions and not more than ten months back work in Freshman.

Sophomores are advanced to Junior rank if they have no Freshman conditions and not more than ten months back work in Sophomore.

Juniors, Classical and Scientific, are admitted to the Senior class if they have no Sophomore conditions and not more than five months back work in Junior.

Juniors, Literary, are admitted to the Senior Class if they have no Freshman conditions and not more than five months back work in Junior.

ASSIGNMENTS.

Assignments are made at the beginning of the Collegiate year, at the beginning of the Winter Term, and at the beginning and close of the Spring Term.

EXAMINATIONS.

Each class is examined in each subject when completed. These examinations may be either oral or in writing, and it is intended that they shall be thorough and complete.

Students absenting themselves from the regular examination of their classes will be charged one dollar for private examinations in each subject.

Students may bring up back work under personal instruction of the Professor in charge of the department or some one whom he may appoint. For such instruction a small fee will be required.

SPECIAL EXAMINATIONS.

Examinations are held for students making up back work on the last Saturday of each term. Students intending to take such examinations must notify the Professor in charge of the department in which examination is desired at least ten days preceding the date of examination. Before examination is given, a receipt from the Treasurer showing that the examination fee has been paid must be presented.

VI. The statutes expressly forbid the students to use intoxicating drinks as a beverage, or play cards, to frequent drinking, gambling or billiard saloons, or improper places of resort of any kind. The Faculty judge places of amusement commonly called "balls" or "dances" to be improper places of resort for students.

VII. Students are requested to notify the President before changing their place of boarding.

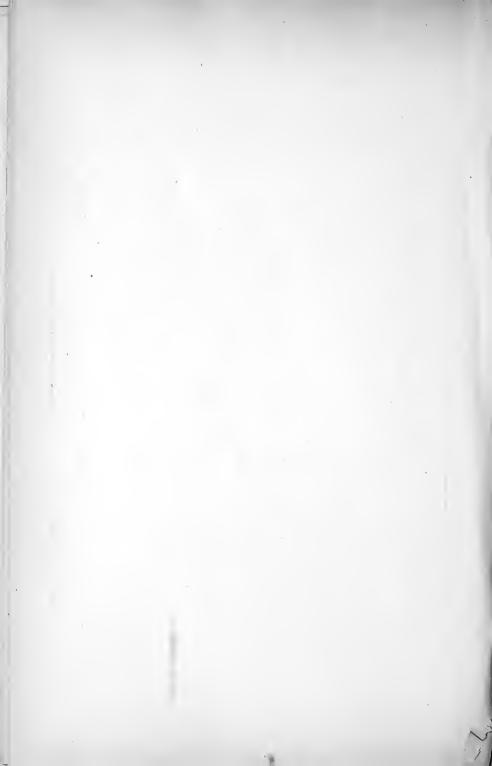

VIII. Ladies and gentlemen are admitted to all privileges of the College on the same footing.

IX. No student is allowed to change his subjects of study without permission of the Faculty.

HONOR RULES.

- I. Competitors for prizes and honors must take all subjects with their class for the time over which the competition extends.
- II. Graduating honors shall be decided by the grades of the Junior and Senior year combined.

EXPENSES.

First Year English and Junior Preparatory—
First Term\$10 00
Second and Third Terms, each
Incidental Expenses, per annum (80 cents per month) 8 00
All other classes—
First Term\$12 00
Second and Third Terms, each
Matriculation Fee, on entering Collegiate Department 5 00
Incidental Expenses per annum (\$1.00 per month) 10 00
For Chemicals, to be paid by students in Chemistry, per term 2 00
Ministers Children, Tuition, not including incidental, half price.
m

The incidental fee is intended to meet the expenses of the College not included in the salaries of the Professors and Instructors.

College Statutes, Chapter II, Sec. 5: Every person, before he is admitted to the privileges of the college, shall obtain from the Treasurer a receipt by which it shall appear that he has complied with the ordinance of the Senate regarding fees and expenses, and if any officer admit to his recitation a student who has not paid up his college bills, such officer shall be held responsible for such bills.

Boarding in private families, including lodging and fuel, has, during the past year, ranged from \$3.50 to \$4.00 per week. Many students board in clubs at the cost of about \$3.00 per week.

To those who club, pay the lowest rates, and the highest rates in private families, the cost per annum is as follows:

For board fuel, room and lig For tuition and incidentals.						
For washing, estimated from						
For text-books						
TOT TEAT DOORS				-		_
Total	\$174	40	\$203	50	\$391	00

In the Junior Preparatory and in the First Year English, the cost is \$8.00 per annum less for tuition and incidentals than in the College. The initiation fee for the gentlemen's Literary Societies is \$5.00; for the ladies', \$3.00; and when a student enters the Freshman class he pays a matriculation fee of \$5.00. Books will average about \$11.00 per annum, except during Junior and Senior years, when the cost becomes greater.

The cost of clothing and traveling, and the private incidental expenses of a student are not included. They will depend largely upon the habits of the student. Clothing need cost but little, if anything, more in College than out.

HONORS.

The following persons received the Honors of the class of '92:

In the Classical Course—T. B. Glass, First Honor.

In the Scientific Course—Ella McCoy, First Honor.

Through the liberality of Dr. Wallace, the use of Two Tickets to the Warren County Library is given to the two students making the highest grade in the Junior Class—one in the Classical and the other in the Scientific Course. W. R. Sawhill and Olive McGarey have been the recipients of the above during the year.

The class of '85 has left with the Faculty a ticket to the Warren County Library, as its memorial, the use of which during the Junior year is to be given to the student making the highest grade in the Sophomore Class. Carlton E. Sox has been the recipient of this ticket during the year.

DEGREES CONFERRED.

At the Annual Commencement held June 9th, 1892, the following degrees were conferred:

А. В.

Chapman, Joseph A. Dean, Frank E. Dean, Frank H. Glass, Thomas B. Innis, John W. Klene, John George King, Fannie Kyle, Samuel Victor

Lorimer, Wallace Moorehead, John H. McKee, Frank W. Paul, Andrew Ralston Polluck, John Samuel Reid, Martha M. Robertson, Lillie Walker, Frank S.

Wherry, Arthur W.

B. S.

Barr, Eva Bissel, Frank A. Diffinbaugh, E. E. Dysart, John B. Hamilton, Charles S. Hamilton, Sherman Henderson, Bessie Holliday, Laura Kennedy, A. G.

Mitchell, Martha L.
Morrow, Martha Lena
McCoy, Ella
McMurdo, Joseph Henry
Nelson, Annie
Pollock, Inis
Stewart, Jean E.
Stewart, Jennie
Wishart, Madge

A. M.

In course on members of the class of '89.

Bradford, John E. French, Charles C. Kilpatrick, Milton M. Lee, John A. Pinkerton, R. G. Porter, James Smith, Dan Everet Story, James B. Tate, J. Howard Wilson, John B. Winget, William B. Wishart, John E.

[·] Deceased.

Alphabetical List.

For convenience of reference the following Alphabetical List of Alumni, with the year of graduation, is given:

Abbey, A. '88.
Abrams, W. H. '64.
Acheson, A. M. '74.
Acheson, J. M. '86.
Acheson, J. L. '88.
Acheson, R. H. '88.
Acheson, L. '91.
Adams, L. J. '74.
Addison, P. J. '70.
Alexander, B. '75.
Alexander, S. J. '81.
Allen, A. M. '66.
Allen, O. '84.
Allen, W. B. '84.

Babcock, J. K. '81.
Babcock, M. E. '81.
Babcock, M. E. '81.
Bacon, A. '60.
Baird, W. '72.
Baldridge, W. R. '79.
Baldridge, M. M. '81.
Baldridge, S. T. '82.
Baldridge, S. T. '82.
Baldridge, S. T. '82.
Baldridge, M. M. '80.
Barclay, T. D. '67.
Barnes, A. H. '72.
Barnes, R. H. '73.
Barnes, M. '83.
Barnes, J. F. '89.
Barnett, A. S. '77.
Barr, E. '92.
Bassett, L. '83.
Baugh, J. M. '65.
Baxter, V. L. '91.
Beach, C. E. '60.
Beach, K. '61.
Beckwith, M. E. '66.
Beckwith, E. '74.
Bell, M. '73.
Bell, W. Q. '78.
Bell, W. Q. '78.
Bell, H. H. '86.
Belville, S. R. '64.
Bennett, M. L. '72.
Berrry, J. R. '72.
Berrry, J. R. '72.
Beveridge, A. '65.

Allison, M. M. '72.
Allison, M. E. '75.
Allison, O. '76.
Allison, S. L. '77.
Anderson, E. M. '65.
Anderson, M. J. '66.
Anderson, J. B. '69.
Anderson, W. T. '70.
Anderson, R. D. '72.
Anderson, T. W. '77.
Anderson, W. L. '88.
Ardrey, W. G. '91.

Beveridge, I. S. '69. Biddle, A. S. '72. Biddle, M. '73. Biddle, W. C. B. '77. Biddle, W. C. B. '77. Biddle, W. C. B. '77. Bidger, H. J. '72. Bigger, H. J. '72. Bigger, D. D., '75. Bissell, F. A. '92. Bivens, R. A. '74. Black, N. J. '67. Black, C. L. '72. Blackburn, A. '68. Blackburn, W. A. '68. Blair, W. H. '59. Blair, D. H. '71. Blair, T. A. '72. Blake, W. E. '67. Blake, W. W. '72. Boomer, J. H. '70. Borders, M. W. '88. Bower, J. A. '66. Boyd, J. H. '72. Boyd, J. N. '77. Boyd, D. M. 82. Boyd, E. N. '85. Bradford, J. E. '89. Brandt, A. W. '71. Bristol, L. H. '77. Brockett, O. G. '75.

Brook, J. W. '64. Brook, H. M. '69. Brook, M. E. '70. Brook, M. 72. Brosius, J. M. '88. Brown, N. H. '60. Brown, J. H. '62. Brown, W. '65. Brown, T. H. '77. Brown, C. '79. Brown, N. E. '86. Brown, J. V. '90. Brownlee, E. A. '68. Brownlee, S. '76.

Cable, C. '76.
Caldwell, D. '68.
Caldwell, A. B. '78.
Calhoun, J. C. '78.
Calhoun, J. C. '78.
Callison, H. G. '86.
Campbell, J. S. '62.
Campbell, M. E. '67.
Campbell, W. T. '70.
Campbell, A. M. '79.
Campbell, T. F. '82.
Campbell, L. N. '85.
Candor, 'T. H. '76.
Carey, I. '75.
Carithers, E. '69.
Carithers, E. I. '72.
Carr, S. '88.
Cecil, C. '64.
Chamberlin, N. M. '90.
Chapman, J. A. '92.
Christie, E. '83.
Clark, J. B. '65.
Clark, J. M. '68.
Clark, J. M. '73.
Clark, E. M. '87.
Cleland, M. A. '71.
Cleland, E. E. '72.
Cleland, J. W. '79.

Davidson, F. E. '76.
Davidson, R. J. '77.
Davidson E. R. '91.
Davis, J. P. '71.
Davis, J. B. '75.
Dean, F. E. '92.
Dean, F. H. '92.
Denman, E. C. '62.
Dickie, A. B. '83.
Diffenbaugh, F. E. '92.
Dool, W. I. '79.
Douglass, E. E. '86.
Douglass, A. C. '90.

Brownlee, I. F. '80. Brownlee, E. M. '81. Brownlee, L. E. '82. Bruen, A. C. '69. Bryson, W. B. '76. Buchanan, W. H. '59. Buchanan, W. J. '79. Buck, S. A. '75. Buck, C. A. '82. Buck, C. F. '90. Burlingim, G. '79. Burns, J. A. '69. Burns, J. C. '75. Burnside, I, '91. Butler, W. M. '84.

Cleland, D. M. '82.
Cleland, J. M. '82.
Cleland, C. S. '87.
Clippinger, E. E. '81.
Clippinger, G. '89.

Whole Number of Alumni, 885.

Alumni changing their occupation or address between this and the publication of the next Triennial Catalogue, will please give notice of the same by March, 1896.

FORMS OF BEQUEST.

I give and devise to the Trustees of the Monmouth College, Monmouth, Illinois, the sum of \$......, or the following property, viz., (specifying the same,) for the uses and purposes for which said trustees are authorized by law to take and hold property; and I authorize my executor to pay the same to the order in writing of the said trustees.

I give, devise and bequeath to the Trustees of the Monmouth College, Monmouth, Illinois, the sum of \$....., to be devoted by them to (here specify purpose,) and to authorize my executor to pay the same to them, or their authorized agent, upon demand.

Special care should be taken that bequests be made according to the laws of the state governing them.
